

Sage ERP X3: Top seven enhancements

Versions 4 to 7

Sage ERP X3 version 4 (named V140)

1. Work confidently with full UNICODE compliance.
2. Do more, faster, with improved administration tools.
3. Improve productivity with enhanced inventory, accounting, and customer management tools.
4. Increase data accessibility with clickable data links leading to more information.
5. Choose from calendars, graphs, and lists available in multiple formats.
6. Improve multi-company operations with inter-company transaction automation.
7. Improve cost analysis with work-in-progress costing.

Sage ERP X3 version 5

1. Enrich business intelligence with new KPIs and integrations.
2. Increase productivity with the enhanced workflow engine.
3. Improve business intelligence with dedicated BI database.
4. View Microsoft® Office documents in Sage ERP X3 with Office integration.
5. Generate documentation online.
6. Ease vertical and specific evolutions with pre-set functions ready to use.
7. Enhance security with workflow traceability.

Sage ERP X3 version 6

1. Easily access multi-legislation and multi-chart of accounts in one folder.
2. View additional new legislations, including Angola, Australia, Austria, Poland, Romania, Russia, Slovakia, and South Africa.
3. Better manage financials with improvements including fixed asset management, treasury, new budgeting and expense management tools, and credit management.
4. Improve operations and manufacturing tasks with sub-contracting, quality management, distribution costs, and optimized order preparation.
5. Enhance collaboration with new visual process engine, LDAP directory, Eclipse integration, Sage Enterprise Webtop, S-Data, and Business Intelligence improvements.
6. Increase efficiency with electronic document management, warehouse management system, and project and job costing integrations.
7. Be ready for the EU payment-integration initiative with SEPA compliance.

Sage ERP X3 version 7

1. Stay connected with mobile web apps that provide access to customers, pricing, inventory, expense management, sales approval, purchase approval, and more—or build your own.
2. Access online information from multiple devices with multi-browser capability and standard browser navigation.
3. Enjoy enhanced Microsoft Office integration including a toolbar for Word, Excel, and PowerPoint¹; easily create a PowerPoint slide from within Sage ERP X3 and synchronize data in Microsoft Office documents with one click.
4. Take advantage of enhanced inventory management, including the ability to add zones within warehouses to quickly locate inventory.
5. Get answers faster from documents, videos, and tutorials in the new Online Help Center, automated document updates, and tools for data and functional searches.
6. Be more productive with functionality improvements including currency conversion options, recurring AP/AR invoices, multi-company processes, and more.
7. Personalize both users and roles with authoring mode to tailor the software to the unique needs of users.
