

DATASHEET

# Enterprise Management Construction\*

*A modern enterprise construction management solution built from the ground up for the construction industry.*

Enabling mid-size to larger domestic and international construction companies to meet industry-specific challenges in an increasingly complex, global marketplace.

## Faster, simpler, and more flexible

Enterprise Management Construction\* runs every aspect of your construction business faster than ever before. Leveraging a history of over 30 years in delivering business applications for the engineering and construction space, this powerful solution from Sage delivers a completely modern and mobile enterprise applications suite built from the ground up to address the complexity and risks faced by today's mid-tier to larger construction firms.

## A foundation of success

Enterprise Management Construction delivers a data-driven, unified experience built on the proven Enterprise Management\*\* platform used by over 5,000 customers worldwide. This industry solution offers core capabilities for complete construction lifecycle management, including: Project Management, Contract & Sub-Contract Management, Estimating, Project Financial and Cash Flow Management, Project Document Management, Timesheet Support, and Project Visualization & Analytics.

Enterprise Management Construction also integrates with existing Sage solutions, including HR, Payroll and CRM products, and other third-party applications like Oracle Primavera and Microsoft Project.

## Global scalability

Enterprise Management Construction is easily scalable, so you'll never run out of capacity again. It quickly adapts to your changing needs, driving efficiency and helping you manage costs and quality so you can complete profitable projects on time and within budget. Optimized for multi-site, multi-country, and multi-entity construction—all your project and financial data, reporting, compliance, and processes are packaged into one system.

\*Enterprise Management Construction was formally known as Sage X3 Construction

## Key benefits for your construction enterprise

---

### Get more done, faster

Increase user productivity and accelerate adoption with an intuitive web interface—easily personalized to work the way your users work—driving efficiency to save time, and increase project profitability.

### Go where your jobs take you

Keep your field teams mobile. Access key project data, manage costs, view project statuses, approve purchases, and view KPIs from any device.

### Keep the focus on your projects

Simplify IT management while leveraging enterprise-class business management functionality, security, and scalability—all at a fraction of the cost and complexity of typical ERP systems.

### Actionable insight

Make better on-site decisions. Access self-service dashboards, KPIs, business intelligence, and reporting tools to evaluate and monitor projects in real time.

### Build on a solid foundation

Reduce costs and complexity with a single, integrated solution encompassing all critical construction enterprise processes.

## Key features

---
